

# Falcon<sup>®</sup> Brand Labware

The brand that sets the standard for high quality laboratory tools

*Falcon cell culture products, including flasks, dishes, plates, and slides create an ideal environment for growing cells in your lab, right from the start.*

## We Put Quality in Everything We Make

There is a reason that Falcon is the most trusted name in labware. Actually, there are several. Falcon products are:

- ▶ Thoughtfully designed with attention to detail
- ▶ Manufactured in cGMP facilities (ISO 13485 or ISO 9001 certified and meets 21 CFR 820)
- ▶ Proven in laboratories around the world for more than 50 years

### **Tested to Ensure Nothing Else Gets in There**

We are committed to maintaining superior quality and continuous process improvements – maintaining your trust.

- ▶ Performance-tested for consistent culture conditions
- ▶ Subjected to rigorous process and quality control procedures

### **Subtle Details Result in Big Differences**

Whether it's the easy-to-read dark graduations on Falcon tubes, the large white writing area, or the negative and reverse graduations on our pipets, Falcon products have been designed, tested, and proven to assist you in your research like no other products on the market. Subtle details have been perfected to make Falcon labware reliable, durable, and easy to use. These details add up to big differences in the way you work.

# Falcon® Brand – An Original, Just Like You.

## Provides Accurate Measures with Every Drop

Precise sample measurement is essential to your experiment. That's why Falcon pipettes are accurate to  $\pm 2\%$  at full volume, Sterility Assurance Level (SAL) of  $10^{-6}$ , RNase-/DNase-free, human DNA-free, noncytotoxic, and nonpyrogenic, with less than 0.1 EU/mL. Extractables data available upon customer request. We know it is important to you – how could you trust your results if you don't trust your labware?

## Protects Sample Integrity in the Toughest Conditions

Whether it's centrifuging, vortexing, or freezing, Falcon tubes have the quality you need to get your job done. Our 50 mL tubes can withstand up to 16,000 RCF and survive in temperatures as low as  $-80^{\circ}\text{C}$  and as high as  $121^{\circ}\text{C}$ . Since not all experiments are the same, simplify your work with tubes that always are.

## Rigorously Tested to Succeed in Your Rigorous Tests

Falcon flasks are designed, manufactured, and tested to meet the highest standards in the industry – yours. Because your experiment deserves the assurance of flasks that are leak tested, surface treatment tested, and cell growth tested. After all, you can't make breakthroughs with labware that breaks promises.

**Warranty/Disclaimer:** Unless otherwise specified, all products are for research use or general laboratory use only.\* Not intended for use in diagnostic or therapeutic procedures. Not for use in humans. These products are not intended to mitigate the presence of microorganisms on surfaces or in the environment, where such organisms can be deleterious to humans or the environment. Corning Life Sciences makes no claims regarding the performance of these products for clinical or diagnostic applications. \*For a listing of US medical devices, regulatory classifications or specific information on claims, visit [www.corning.com/resources](http://www.corning.com/resources).

*Corning's products are not specifically designed and tested for diagnostic testing. Many Corning products, though not specific for diagnostic testing, can be used in the workflow and preparation of the test at the customer's discretion. Customers may use these products to support their claims. We cannot make any claims or statements that our products are approved for diagnostic testing either directly or indirectly. The customer is responsible for any testing, validation, and/or regulatory submissions that may be required to support the safety and efficacy of their intended application.*
